

Swap Tank VS NPD VS Gas Blower

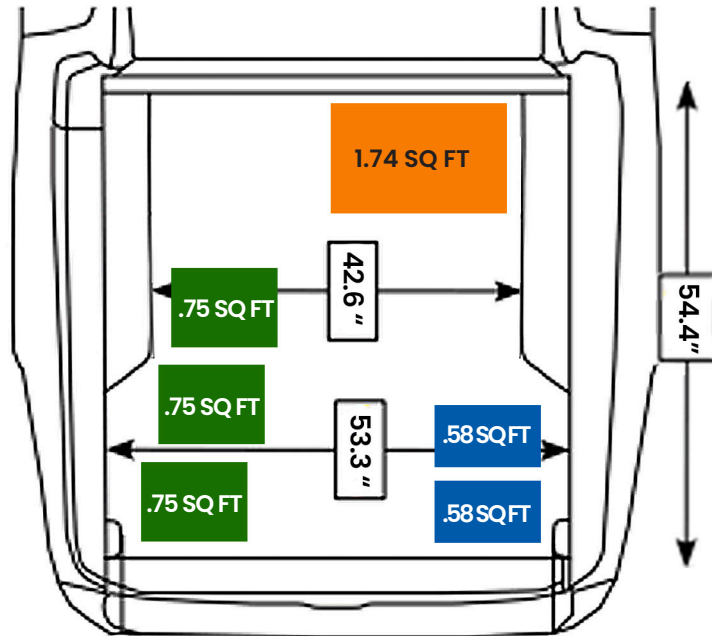

Total SQ FT = 2.25 SQ FT

Total SQ FT = 1.16 SQ FT

Total SQ FT = 1.74 SQ FT

Swap Tank VS NPD VS Gas Blower

WHAT APPLICATOR TAKES UP THE LEAST AMOUNT OF SPACE?

- The above line drawing demonstrates the square footage requirements needed for each applicator type. This is expensive real estate, so create a designated area that provides easy access.
- If your plan is to add a topper to your vehicle, review the height of each applicator; above.
- All Swap Tank Technologies state: Their system reduces cross-contamination, cross-contamination of any volume is not acceptable. So, the only option is to have one tank just for fresh water, used to quickly flush out the sprayer after each use. The increased labor time and wear and tear of tanks being removed, adds additional servicing requirements.
