**Weight:** Dauber: 5.9oz; Quart: 55.9oz; Gallon: 12.5lbs.

**Installation:** Dot, dab, stripe- however you want to apply!

**Installation Requirements:** Clean surface

**Warranty:** 2 years

### Target: Populated Areas

Flock Off! UV Reflective Paint is a visually intense way to deter birds away from an area. Made with a component that reflects the sun's ultraviolet rays, it can be used in one of three ways:

- **Bird Building Collisions:** Apply Flock Off! UV Paint on areas that are prone to bird collision related deaths. Example applications are wind turbines, waste pit fences, oil spills, towers, or solar panels. This acts as a visual warning to deter birds and will decrease the likelihood of bird collision related deaths.
- **Deter Resident Birds:** Help move stubborn birds by using Flock Off! UV Reflective Paint in conjunction with other deterrents. Pair Flock Off! UV Paint with shock systems, hazers, spikes, gels, etc. Flock Off! UV Paint adds an additional visual component to any deterrent for a complete bird control system.
- **Migratory Birds:** Migratory birds tend to avoid unfamiliar objects because they represent a threat. Applying Flock Off! UV Paint will give the affected area a novel look. This will make any area treated with Flock Off! UV Paint the ultimate threat that migratory birds instinctively avoid.

Flock Off! UV Reflective Paint is available in three different sizes, for your convenience: Quart, Gallon, or a 4 ounce Dauber! Flock Off! is available in Bright White or Invisible
