GD3	3" Waterless Trap Seal	1/96	
GD35	3-1/2" Waterless Trap Seal	1/96	
GD4	4" Waterless Trap Seal	1/96	

TRADITIONAL FLOOR DRAIN TECHNOLOGY POSES A VARIETY OF PROBLEMS IN TERMS OF MAINTENANCE AND SAFETY, BUT THE GREEN DRAIN SOLVES THESE MAJOR PROBLEMS IN A BIG WAY:

- **Sewer odors often cause a nasty smell in buildings from floor drains.** The Green Drain's one-way valve eliminates those nasty odors, while still keeping the drain fully functional at all times.
- **Traditional floor drains could quickly become a doorway for pests such as flies, cockroaches and rodents.** However, the Green Drain has a silicon skirt attached, preventing pests from getting in.
- **Traditional drain trap primers need to be replaced often and are a pain to replace.** The Green Drain takes mere seconds to install and also acts as a barrier trap protection device.
- **Traditional drains require consistent chemical treatments as part of their maintenance.** The Green Drain eliminates the need for chemical applications, making it better on the environment.
