

# The Eco-Friendly Mosquito Trap

QISTA is a French company founded in 2014. Currently headquartered in Sénas, it has developed a mosquito control solution that complements traditional mosquito control methods that involve chemical treatments, such as insecticides and repellent lotions.

Present in 36 countries in over 100 cities and local authorities

## Why QISTA?

Ecological. Smart. Noise-free.  
The traps reduce mosquito nuisance by up to %88.

### Eco-Friendly

Each QISTA trap acts as a human.  
1 trap = 1 human.

### A Selective Method

Only female mosquitoes are attracted to the trap.

### No Phenomenon of Resistance

Attract and capture based on a natural need.

### Mechanism

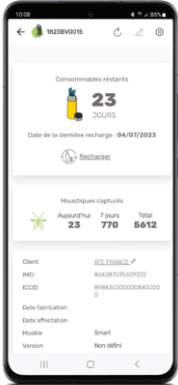

Emitting recycled CO<sub>2</sub> mainly from grain fermentation to imitate human breathing

Releasing olfactory lures to simulate human body odor (brings the mosquito closer to the trap)

Mosquito captured by suction mechanism

QISTA traps provide a cutting-edge solution to mosquito control. This unique technology ensures optimal performance in terms of efficiency and comfort.

# A World-Exclusive Smart Solution Worldwide

More than just mosquito control solutions, Qista traps are a technological innovation, providing users with ease of use through the Web APP interface.

- Trap monitoring via a Wifi-network
- Pre-set programming based on the targeted mosquito species
- Tracking of consommables levels
- Use of the 'Night mode' for a better acoustic comfort
- Analytical data recording of trapped mosquitoes with capture time and quantity

## Features & Specifications

Effective against all mosquito species, including the tiger mosquito

Programmable via Wi-Fi network

Non-toxic

Made in France
